**THIS IS
PUBLIC
HEALTH**

LECTURE AND DISCUSSION SERIES ON PRIME TOPICS IN PUBLIC HEALTH

How are new data sources forming public health research? How do law and health interact? What challenges does public health face – and what solutions does it offer?

Crisp and interactive talks followed by student-lead discussion will reflect these and other novel and challenging topics.

This lecture series is designed for students of medicine and health sciences, including those with no background in public health.

Information, reading materials, live streaming and recorded lectures can be found [here](#)

Moderator: Dr. Emily Reeves, SSPH+
